

Dolphin Academy developed the educational project "Bayena i Dòlfein" (Whale and Dolphin) in 2005, with the purpose to give every child in Curaçao the chance to learn more about whales, dolphins and marine life. The students will be provided with a deeper understanding while creating a platform of awareness about the surroundings, the beauty and uniqueness of Curaçao.

The teaching materials for the project are now available in three languages for Elementary Schools, grade 3 to 8. Each curriculum covers one aspect of the marine life per grade and fits within the education area "Nature & Technology".

## Content of the program

- Material for six lessons, divided into three chapters
- Work booklets for students with fun facts and information
- A teacher's guide with answers, additional information and activities for the schools
- A Dolphin Masterclass given at school by a guest teacher of Dolphin Academy
- A visit to the Dolphin Academy and Sea Aquarium, including transportation and a Dolphin Kiss for every student
- Student will get a lunchbag, a goody bag and more at the end of the visit

Please consider partnering with us as we invest in our community and local children.  
You can sponsor one class for only naf 599,-
